

THE EUROPEAN UNION-AMERICAN MONSTER

Massive 'Free Trade' agreement part of new global economic order plan

President Obama, in his 2013 State of the Union address, announced a colossus new 'free trade agreement' that could mean the end of U.S. sovereignty.

This obese agreement, titled the Transatlantic Trade and Investment Partnership (TTIP) is moving forward at a stunning pace, with the goal of finalizing it before the end of 2014.

Despite the lofty promises declared with previous trade agreements (including NAFTA), millions of good paying jobs are lost to nations with less expensive markets, and cost us billions in trade deficits.

The European Union started out 50 years ago through a series of "trade" agreements. Then by design, the agreements cleverly morphed into a Regional Government; now known as the E.U.

If ratified, the U.S. could very well take a giant leap forward into becoming a

subservient state in the new global economic system.

The Globalists have had an agenda for years. NAFTA was sold to U.S. voters as a "trade" agreement, but was later clarified by Former Secretary of State Henry Kissinger when he said the NAFTA agreement was "the architecture of a new international system." He also labeled NAFTA as "the most creative step toward a New World Order since the end of the Cold War."

Get informed. Our very freedom and sovereignty is at stake.
